### Official Papers.

#### DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 1st December 1932.

#### Final Forecast of the *Bhadoi* Crops of Bengal, 1932-33.

(NOTE.—On an average of the five years ending 1930-31, the area under autumn rice in Bengal has represented some 6·1 per cent. of the total area under rice in British India.)

**Character of the season.**—As reported in the preliminary forecast, the rainfall in February and March was favourable for the preparatory tillage, but the drought that followed and extended up to the middle of April was detrimental to the progress of sowings and reduced the area as a consequence. The rainfall in the latter part of May proved generally good for further sowings and occasional rainfall with alternate sunshine subsequently helped the growth and development of the crops though inadequate rainfall in some places caused a fall in outturn. On the whole the season was a fairly favourable one this year.

**Acreage.**—The total acreage sown with the different *bhadoi* crops this year is reported to be 6,534,500 acres as against 6,929,100 acres last year. Of this, the area under autumn rice is estimated at 5,787,500 acres as against 6,163,000 acres last year.

**Outturn.**—According to District Officers' estimates, the outturn of the different *bhadoi* crops for the Presidency works out at 79 per cent. of the normal this year as against 81 per cent. last year.

The autumn rice is estimated to yield an outturn of 78 per cent. of the normal for the province this year as against 90 per cent. estimated by this department last year. In my opinion the outturn of autumn rice is an underestimate and the crop will not be less than 83 per cent. of the normal this year.

On the basis of a normal yield of 12½ maunds of clean grain per acre, the gross outturn of *bhadoi* paddy (autumn rice) for the province is estimated at 2,205,700 tons this year as against 2,190,400 tons last year.

G. P. HECTOR,  
Director of Agriculture, Bengal.

**DEPARTMENT OF AGRICULTURE,

Dacca, the 6th December 1932.

**Third Forecast of the Cotton Crops of Bengal,  
1932-33.**

(NOTE.—On an average of the five years ending 1930-31, the area under the cotton crops in Bengal has represented some 0.2 per cent. of the total area under cotton in India.)

There are two crops, early and late. The “early” crop is chiefly grown in the Chittagong Hill Tracts and in the Tripura State and to a small extent in other districts. The “late” crop is grown in Bankura and Midnapore.

**Character of the season.**—As indicated in the preceding forecasts, the weather at the outset was favourable in Bankura and the Tripura State, but unfavourable in Midnapore, Mymensingh and the Chittagong Hill

Tracts. Later on heavy and continuous rain in Mymensingh affected the crop in that district, but alternate rain and sunshine much improved the outturn in the Chittagong Hill Tracts and the Tripura State. On the whole the outturn of the early crop was a better one this year.

The prospects of the late crop, so far, are favourable.

**Area sown.**—The total area sown with early cotton is returned at 74,590 acres and that with late at 1,100 acres this year as against 74,327 and 1,103 acres, respectively, in the corresponding forecast last year.

**Outturn.**—The outturn of the early crop is estimated at 20,195 bales and the late crop at 308 bales as against 16,608 and 338 bales, respectively, in the corresponding forecast of last year.

CALCUTTA, THE 5TH DECEMBER 1932.

**RESOLUTION—No. 14291Emi.**

Read—

The Reports on inland emigration under the Assam Labour and Emigration Act, 1901 (VI of 1901), for the year ending the 30th June 1932, submitted by the Superintendent of Emigration, Calcutta, and the District and Assistant Superintendents of Emigration.

There was a further falling off in the number of emigrants despatched to the labour districts during the year under review since recruitment was curtailed owing to the general trade depression.

2. Recruiting operations in Bengal were conducted only in the districts of Birbhum and Midnapore. The number of garden sardars employed during the year was 60 (including 11 sardarnis) as against 100 and 263 in the two previous years. All worked under the control of licensed local agents. The number of local agents' licenses was 14 as against 12 issued in the previous year. The total number of emigrants recruited in Bengal was 97 as against 132 in the previous year. Of these 80 came from Birbhum. The total number of recruits from Bengal and other provinces embarking at Goalundo was 1,522 (including those recruited in the Bombay Presidency outside the Act) as compared with 7,706 in the previous year.

3. The rest-houses for emigrants at Asansol, Kharagpur, Naihati and Goalundo maintained by the Tea Districts Labour Association were frequently inspected and their condition was found to be in all respects satisfactory.

4. Of the 58,328 emigrants who halted at Naihati, 11,008 went to the Dooars *via* Lalmonirhat. The rest with the exceptions of those mentioned below went to Assam *via* Amingaon or Goalundo. One emigrant died of chronic malaria at Naihati, but no other death occurred among the emigrants in transit. Out of the total number of emigrants who arrived from the different recruiting districts in and outside the Presidency of Bengal two deserted, one from Kharagpur and the other from Naihati. There was no desertion nor death among the emigrants during their journey from Goalundo to their final destinations as against ten desertions during the previous year.

5. In connection with the transport of labour to Assam the receipts increased from Rs. 650 to Rs. 700 and the expenditure decreased from Rs. 8,886-8 to Rs. 7,544-6, as compared with the previous year.

6. The office of the Superintendent of Emigration was held by Lt.-Col. A. Denham White, I.M.S., from the beginning of the year up to the 28th April 1932, on which date he went on leave, and by Lt.-Col. K. S. Thakur, I.M.S., from the 29th April 1932 till the end of the year. The thanks of the Governor in Council are due to them and to the local officers for their assistance in the administration of the Act.

By order of the Governor in Council,

H. C. V. PHILPOT,

*Secretary to the Government of Bengal.*

**NOTIFICATION.**

No. 5658M. — 25th November 1932.—The following is published for general information under section 41 of the Licensed Warehouse and Fire Brigade Act, 1893 (Bengal Act I of 1893).

H. P. V. TOWNEND,

*Secy. to the Govt. of Bengal.*

No. 1023M., dated Chinsura, the 18th August 1932.

Memo.—By the Commissioner of the Burdwan Division.

Copy of memorandum No. 2394G., dated the 24th June 1932, from the District Magistrate of Howrah, with copies of the two statements, forwarded to the Secretary to the Government of Bengal, Local Self-Government Department.

The huge remission of Rs. 2,172 was due to the fact that some of the godowns which had been included in the demand for the year 1930-31 were afterwards found vacant.

No. 2394G., dated Howrah, the 24th June 1932.

Memo.—By the Magistrate of Howrah.

Copy, with statements in duplicate, forwarded to the Commissioner of the Burdwan Division. The collection has much improved in comparison with last year.

No. 516G., dated Howrah, the 21st June 1932.

From—Sreejut Khagendra Nath Ganguly,  
B.L., Vice-Chairman, Howrah Municipality,

To—The Magistrate of Howrah.

As requested in your letter No. 2036, dated the 23rd May 1932, I have the honour to submit herewith two statements, one showing the warehouses licensed under the Fire Brigade Act, 1 of 1893, and the other showing the receipts and disbursements on account of the same for the year 1931-32. The former statement has been prepared in accordance with the instructions contained in the Government of Bengal, Municipal Department, letter No. 470M., dated the 14th February 1917, to the Commissioner of Burdwan Division, a copy of which was forwarded under his memorandum No. 137/XXIII-S, dated the 16th February 1917.

The collection of fees worked out to be 96·9 per cent. of the arrear demand and 94·8 per cent. of the current demand as against 63·7 per cent. of the arrear demand and 87·5 per cent. of the current demand of the year 1930-31. The demand for the year under report amounted to Rs. 26,590 and the collection to Rs. 25,264 as against Rs. 26,231 and Rs. 25,087 for demand and collection, respectively, for the year 1930-31.

The contribution which the Commissioners were called upon to pay for the maintenance of the Fire Brigade amounted to Rs. 65,316.

The directions contained in the first proviso to section 10 of the Act have been followed.

Dated Calcutta, the 19th September 1932.

From—L. H. Colson, Esq., J.P., Commissioner of Police, Calcutta,

To—The Secretary to the Government of Bengal, Local Self-Government Department.

I have the honour to submit the report on the working of the Calcutta Fire Brigade for the year ending the 31st March 1932, as drawn by Captain Bernard A. Westbrook, O.B.E., Chief Officer, Calcutta Fire Brigade.

No. F. B. 755, dated Calcutta, the 16th September 1932.

From—Captain Bernard A. Westbrook, O.B.E., Chief Officer, Calcutta Fire Brigade,

To—The Secretary to the Government of Bengal, Local Self-Government Department.

(Through L. H. Colson Esq., Commissioner of Police, Calcutta.)

I have the honour to submit the following report on the working of the Calcutta Fire Brigade for the year ending the 31st March 1932.

The work of the department during the year under review has been normal and there are no special comments to make.

**Financial statement.**—The statement of receipts and expenditure and payments made by municipalities within the jurisdiction of the Fire Brigade and Licensed Warehouse Act (I of 1893) is given in Appendix I.

The cost of maintenance of the Fire Brigade is derived from contributions by (a) the Calcutta Municipality and (b) the Howrah Municipality, the former contributing 86 per cent. and the latter 14 per cent.

Fees for licensed warehouses are charged under section 10 of the Licensed Warehouse and Fire Brigade Act I of 1893, and are levied at 10 per cent. of the annual valuation of warehouses, subject to a maximum of Rs. 750 per warehouse per annum, and the income thus derived is credited to the Fire Brigade Fund, and deducted from the amount required from the municipalities concerned. In this connection it is satisfactory to note that the amount actually required to be paid from the rates for the maintenance of the Fire Brigade is considerably reduced.

During the year 1930-31, 38 per cent. of the contribution required from the Calcutta Municipality was derived from this source leaving 62 per cent. only to be contributed from the rates. The contribution from the Calcutta Municipality to the Fire Brigade Fund in 1930-31 was Rs. 3,55,993. A similar percentage approximately applies to the Howrah Municipality, which contributed Rs. 57,952 in 1930-31. Rupees 420-2 were received in fees for attending fires out of the jurisdiction of the Calcutta Fire Brigade.

I am glad to be able to report that a considerably larger income has been derived from taxation under the above Act, and it is anticipated that a reduction of over Rs. 50,000 will be made in the forthcoming budget. Thus the amount of contributions required from the municipalities concerned will be proportionately smaller.

**Fires, etc.**—The total number of calls for fires, or supposed fires was 583, being a decrease of 108 as compared with the previous year and a decrease of 56 as compared with the average of the past ten years. The actual number of calls for fires was 452, which shows a decrease of 38 as compared with the previous year, and the number of fires classed as serious (*i.e.*, over Rs. 20,000 damage per fire—see Appendix 3) was 12, being the same number as the previous year.

The following statement shows the hours when the calls were received:—

In the Annual Report for the previous year special mention was made of the large increase in the number of wilful false alarms given by the public from street fire alarms, and the lack of assistance rendered by the persons in the vicinity in giving information which would enable the arrest of any one giving a false alarm. This year 83 alarms of this nature were received which shows a satisfactory decrease as compared with 156 in 1930-31, and an average of 94 during the past ten years, but there is no doubt that this figure could be still further reduced if the public would co-operate with the police and Fire Brigade in preventing the abuse of the fire alarm system. Any information which would lead to the arrest of a person giving a wilful false alarm would be of very great assistance, but I regret to say that such information is rarely forthcoming, although enquiries are always made from persons in the immediate vicinity of a fire alarm when the same is mischievously operated, and such persons must, in many instances, be able to give useful information.

It is hoped that the general public will now co-operate in this respect.

During periods of communal tension false alarms from street fire alarms are specially prevalent.

Regarding false alarms of fire from private telephone again I am glad to report that very little trouble occurs in this connection. This is entirely due to the much appreciated action of the Bengal Telephone Company in disconnecting subscribers who permit their instrument to be used for such purposes, either knowingly or unknowingly, otherwise there is no doubt the number of false alarms from this source would have been much greater. Four false alarms of this nature were received during the year under review which is the same number as the previous year.

Nineteen false alarms were due to electrical defects in the street fire alarm systems as compared with 24 during the previous year, and the number of false alarms either accidental, or given with good intent is 8 (13 in 1930-31).

The calls are classified as follows:—

Fires .. .. .	452	(490)
False alarms, wilful, from street fire alarm ..	83	(156)
False alarms, due to electrical defects ..	19	(24)
False alarms given with good intent or accidental ..	8	(13)
False alarms from private telephones ..	4	(4)
False alarms due to lightning ..	3	(..)
Special service (buildings collapsed, etc.) ..	14	(4)

(The figures in brackets refer to the previous year.)

On 126 days 1 fire, or supposed fire occurred ..	126
On 86 „ 2 fires, or supposed fires occurred ..	172
On 42 „ 3 ditto ..	126
On 20 „ 4 ditto ..	80
On 5 „ 5 ditto ..	25
On 9 „ 6 ditto ..	54
	<u>583</u>

The actual number of calls received during the year was 862 as compared with 983 during the previous year. These figures include instances where more than one call was received for the same fire, and are given for the purpose of classifying and comparing the means by which calls for fires, etc., are given.

These calls were transmitted to the Fire Brigade as follows:—

By private telephones 463 (486 in 1930-31); by street fire alarms 352 (458 in 1930-31); by messengers giving information at fire station 27 (28 in 1930-31); by direct fire telephones from theatres, cinemas, public buildings, etc. 15 (7 in 1930-31); by firemen on “Lookout” duty 5 (4 in 1930-31).

Regarding the calls for actual fires in 167 cases the first information was transmitted to the Fire Brigade by means of street fire alarms, and in 261 cases by private telephones.

**Means by which fires were extinguished:—**In 262 cases fires were extinguished by first-aid machines, chemical fire extinguishers, buckets of water by firemen, or by occupiers before the arrival of the Fire Brigade; in 95 cases by 1 motor fire engine, in 19 cases by cutting or disconnecting electric fuses; in 17 cases by 2 motor fire engines; in 14 cases by the application of sand; in 10 cases by hydrants; in 8 cases by 3 motor fire engines; in 5 cases by first-aid machines and 1 motor fire engine; in 2 cases by first-aid machines and hydrants; in 2 cases by 1 motor fire engine and hydrants; in 2 cases by 4 motor fire engines; in 2 cases by 6 motor fire engines and fire float; in 2 cases by 7 motor fire engines, fire float and hydrants; in 2 cases by fire float; in 1 case by 3 motor fire engines and hydrants; in 1 case by 1 motor fire engine and fire float; in 1 case by turning gas off; in 1 case by 2 motor fire engines, hydrants and sprinklers; in 1 case by 2 motor fire engines and 2 fire floats; in 1 case by 4 motor fire engines, fire float and hydrants; in 1 case by 5 motor fire engines, hydrants and fire float; in 1 case by 8 motor fire engines, and fire float; in 1 case by 9 motor fire engines, fire float and hydrants and in 1 case by 9 motor fire engines and fire float.

**Fires in licensed premises.**—Thirty-nine fires occurred in premises licensed under the Licensed Warehouse and Fire Brigade Act I of 1893, as compared with 29 during the previous year.

**Fire loss.**—The total damage caused by fire and water during the year has been estimated at Rs. 14,30,291, being an increase of Rs. 7,04,251 as compared with the previous year. The average total damage per annum for the past ten years is Rs. 12,30,380. This increase is due to a series of serious jute fires, the causes of which were not satisfactorily ascertained. The average damage per fire is Rs. 3,164, as compared with Rs. 1,481 for the previous year, and an average of Rs. 1,896 per fire for the past ten years.

The loss per fire is classified as follows:—

322 fires under Rs. 100 ..	(333)
69 fires from Rs. 100 to Rs. 1,000 ..	(99)
36 fires from Rs. 1,000 to Rs. 5,000 ..	(31)
13 fires from Rs. 5,000 to Rs. 20,000 ..	(15)
6 fires from Rs. 20,000 to Rs. 1,00,000 ..	(11)
6 fires above Rs. 1,00,000 ..	(1)
Total <u>452</u>	<u>(490)</u>

(Note.—The figures in brackets refer to the previous year.)

**Appliances.**—On 20th March 1932, two “G” type low-load line 250/300 gallons per minute capacity fire engines, fitted with 35 gallons “first-aid” cylinders, 30 feet trussed telescopic ladders, etc., were received from the makers and placed in commission at headquarters, and Central Avenue fire stations.

This type of fire engine is found to be particularly useful in congested traffic conditions and will effect a saving of time in responding to calls.

The following is a list of the principal appliances now in commission by the Calcutta Fire Brigade.

Twenty motor fire engines as follows:—

One motor pump, 600-800 gallons per minute capacity, fitted with scaling ladders, etc. (motor pump No. 2).

Five motor pumps, 500-700 gallons per minute capacity, fitted with 55 feet telescopic fire escapes, etc. (motor pumps Nos. 1, 15, 18, 19 and 20).

Two motor pumps, 450-550 gallons per minute capacity, fitted with telescopic ladders, first-aid cylinders and reels, scaling ladders, etc. (motor pumps Nos. 9 and 10).

One motor pump, 450 gallons per minute capacity, fitted with scaling ladders, etc. (motor pump No. 8).

Two motor pumps, 450 gallons per minute capacity, fitted with first-aid cylinder and trussed telescopic ladders (motor pumps Nos. 14 and 11).

Three motor pumps, 400-500 gallons per minute capacity, fitted with telescopic ladders, first-aid cylinders and reels, etc. (motor pumps Nos. 5, 6 and 7).

Three motor pumps, 300 gallons per minute capacity, fitted with telescopic ladders, first-aid cylinders and reels, etc. (specially designed for use in narrow streets and congested areas), (motor pumps Nos. 3, 12 and 16).

Two “G” type low-load line motor pumps, 250-300 gallons per minute capacity, fitted with 35 gallons “first-aid” cylinders and 30 feet trussed telescopic ladders (motor pumps Nos. 4 and 17).

One motor trailer pump, 250 gallons per minute capacity (specially designed for use in positions that cannot be reached by the ordinary type of motor fire engines).

One mechanically-operated 85 feet motor turntable ladder, 1 motor lorry fitted as emergency tender, 3 lorries, 1 motor car, 160 feet turntable ladder (converted for motor traction), 21 hook ladders, 48 scaling ladders, 9 smoke helmets and breathing apparatus, 63,675 feet of 2½-inch unlined canvas hose, etc.

The appliances are distributed as follows:—

**Headquarters.**—Five motor fire engines (Nos. 2, 11, 17, 19 and 20), 1 motor trailer pump, 2 motor lorries, 1 motor car, 7 hook ladders, 8 scaling ladders, 5 smoke helmets, 4 telescopic ladders and 25,575 feet of 2½-inch canvas hose.

**Central Avenue.**—Five motor fire engines (Nos. 1, 4, 14, 15 and 18), 1 motor turntable ladder, 8 scaling ladders, 2 smoke helmets, 4 telescopic ladders, 1 motor lorry, 13,050 feet of 2½-inch canvas hose and 6 hook ladders.

**Howrah.**—Two motor fire engines (Nos. 8 and 9), 4 hook ladders, 8 scaling ladders, 1 telescopic ladder and 6,450 feet of 2½-inch canvas hose.

**Cossipore.**—Two motor fire engines (Nos. 7 and 10), 2 telescopic ladders, 4 hook ladders, 8 scaling ladders and 7,350 feet of 2½-inch canvas hose.

**Garden Reach.**—One motor fire engine (No. 12), 1 telescopic ladder, 4 scaling ladders, and 2,700 feet of 2½-inch canvas hose.

**Nimtolla.**—One motor fire engine (No. 3), 1 telescopic ladder, 4 scaling ladders, 1 hose cart, 1 smoke helmet and 2,325 feet of 2½-inch canvas hose.

*Sibpore*.—One motor fire engine (No. 5), 1 telescopic ladder, 4 scaling ladders and 2,325 feet of 2½-inch canvas hose.

*Kalighat*.—Two motor fire engines (Nos. 6 and 16), 2 telescopic ladders, 4 scaling ladders, 1 smoke helmet and 3,900 feet of 2½-inch canvas hose.

It is estimated that the motor fire appliances travelled 14,740 miles during the year to and from calls as compared with 13,602 miles in the previous year.

The following statement gives the number of times each motor fire engine has been turned out in response to calls:—

*Note*.—Motor fire engines Nos. 4 and 17 were placed in commission on 20th March 1932.

The total number of pumping hours at fires during the year was 1,318 hours 45 minutes as compared with 721 hours in the previous year.

**Fire stations**.—Appendix IV gives the number of times each fire station has been turned out in response to fire calls, together with monthly statements.

On 18th June 1931, the newly erected fire station at Kalighat was opened by Mrs. L. H. Colson. This station provided accommodation for two fire engines and 20 men. It is situated in a district containing many serious fire risks and on various occasions has proved its utility in preventing fires spreading.

Fire Brigade headquarters are still located in rented premises in Corporation Place. The site is excellently situated, but the premises are inconvenient and lack sufficient accommodation. However, owing to the present financial stringency and difficulty in finding a suitable site for the erection of permanent headquarters, it is anticipated that the Fire Brigade will have to remain in occupation of the present headquarters for some years. With this object in view many improvements have recently been carried out and a new lease has been entered into.

**Staff**.—The strength of the Brigade during the year was 269 as detailed below:—

One Chief Officer, 1 Second Officer, 1 Chief Engineer, 5 Station Officers, 8 Engineers, 7 European firemen, 1 Warehouse Inspector, 3 clerks, 1 store-keeper, 3 telephone operators, 2 carpenters, 2 lathe mechanics, 1 fitter, 1 blacksmith, 1 tinsmith, 10 Indian drivers, 1 head tindal, 18 tindals, 190 khallasias and 12 menial employees.

The conduct and discipline of the staff throughout the year have been excellent.

**Fatalities and accidents**.—Appendix VI gives short reports of fires and special occurrences involving loss of life or serious accidents.

The number of lives lost during the year under review is 17 as compared with 11 in the previous year.

I regret to report that the fatalities include fireman Singh Bir Ghoorum who was killed by a falling wall on 4th May at the Ghosery Jute Press, Howrah. Six deaths were supposed cases of suicide by burning. Two Bengalees were burnt to death owing to a pressure oil lamp exploding. Two deaths were due to fireworks exploding. Two persons were killed owing to buildings collapsing and in one case the

Fire Brigade assisted in extricating a man who had been knocked down and killed by a motor bus. The remaining three fatalities were due to clothing becoming ignited in normal fires.

Fifteen persons were injured at fires, as compared with forty-four in the previous year.

I am again glad to report that no serious accidents occurred during training recruits, or at drill.

In all cases, where necessary, first-aid was rendered by the Fire Brigade and the injured persons conveyed to hospital by motor ambulances.

**Water-supply.**—For many years passed the question of providing an adequate number of sluice valves, etc., on the mains used for fire fighting has been mentioned, but I regret that but little action has been taken. Under the existing circumstances when it is necessary to repair mains or add fresh connections practically the whole of the water-supply system has to be closed down.

Fortunately no serious fire occurred when the water-supply was not available, and improvised arrangements enabled the Fire Brigade to deal with such calls as were received. The danger of fires developing during such periods, however, must be pointed out, and it is to be hoped that such shut-downs will not be made unnecessarily and that they will be limited to the minimum possible time.

It is essential that further sluice valves should be provided in the water-supply system so that repairs, etc., can be effected without closing down completely.

On 30th May, owing to a burst in the unfiltered water mains at the junction of Muktarām Babu Street and Chittaranjan Avenue, the Mullick Ghat Pumping Station was closed down for nearly twelve hours. This pumping station supplies the water to be utilised for fire extinguishing in approximately that portion of the city north of the maidan. Various arrangements were made to deal with fires during the period the water was off, such as conveying a great number of chemical fire extinguishers to fires on lorries, sending on water in water carts, and also a very large quantity of hose in case relay-pumping had to be resorted to. Luckily no fires occurred during this period which could not be extinguished by first-aid measures, but it must be pointed out that the risk of a conflagration was very great.

In the above case four fire engines assisted in dewatering the trench where the burst occurred, pumping in all for 15½ hours.

On 28th December the Watgunge Pumping Station had to be closed down owing to a large burst in the mains in Diamond Harbour Road. Consequently no water was available for fire-extinguishing in the southern portion of the city for about twenty hours. Fire engines were employed for about seven hours in dewatering the trench in which the repairs were being carried out. Here again luckily no fires which could not be dealt with by first-aid means occurred in this area whilst the water-supply was off.

On 19th December at 1-30 p.m. considerable shortage of water was experienced at a fire which occurred in Abhay Mitter Street, Kumartooli Square, and there was very great difficulty in preventing the fire from spreading.

On 2nd March at 4-50 a.m. sufficient water could not be obtained from the mains to extinguish a fire in the northern portion of Ward No. 1. Fortunately a canal was within reasonable reach and two fire engines were operated therefrom, otherwise a large area would have been devastated.

I again regret to have to report that no progress has been made in providing a water-supply for fire extinguishing in the Chitpore-Cossipore district and the resources of the Fire Brigade are often severely strained in dealing with fires which occur in that area. The only available water is from ponds and the river which necessitates the use of enormous quantities of hose. Frequently as many as three hundred 75 feet lengths of hose are used in extinguishing one fire.

It is hoped that the provision of a suitable water-supply for fire extinguishing in this district will shortly receive the consideration its importance demands.

The Cossipore-Chitpore district comprises exceptionally serious fire risks—principally jute presses and warehouses, and the situation is gradually becoming worse as so many of the ponds, hitherto relied upon for the supply of water are now being filled up on sanitary grounds or to provide sites for buildings. In this connection I would particularly point out that the lack of water makes the work of the firemen extremely hazardous as they have to approach much closer to burning buildings and take up more dangerous positions than would otherwise

be necessary. The majority of the warehouses are very badly constructed and the expansion of jute when involved in a fire rapidly causes the walls and roof to collapse.

The scarcity of water in the Howrah district still gives rise to the greatest apprehension. As in Cossipore-Chitpore reliance for water is placed on the various ponds and the river. These ponds are rapidly being filled up to make building sites and on sanitary grounds, and owing to mud banks in the river, at many points the fire float cannot approach sufficiently near to the shore to be of any practical use. The district abounds with serious fire risks and it is remarkable that more serious fires have not occurred.

As mentioned in the previous Annual Report a scheme has been submitted and approved for the provision of a few hydrants in suitable positions in the mains supplying water to the overhead reservoirs. This scheme involves a small expenditure only, but I regret to say that so far no hydrants are available for fire extinguishing. It is anticipated that work will be commenced shortly and it is hoped to have some hydrants available before the end of the year. However, the work undoubtedly will proceed slowly owing to the financial difficulties experienced by the municipality in question.

The risk of a great fire developing in the Howrah district is ever present and I trust that arrangements will be made to put the work in hand without any further unnecessary delay.

The fact that the fire float cannot approach certain portions of the Howrah river bank at low tide further complicates matters, and often the greatest difficulty has been experienced in obtaining sufficient water even to stop fires from spreading.

**Fire float.**—The fire float (5,000 gallons per minute capacity) is stationed on the river opposite the Prinsep's Ghat. During the year under review it has responded to 16 calls as compared with 8 calls in the previous year.

**Street fire alarms, telephones and electrical communication.**—It gives me great pleasure to record appreciation of the work done by the Bengal Telephone Company and the thanks of the Brigade are due to every member of that Company. The telephone operators have been remarkably efficient in their duties and all necessary repairs to fire alarms, telephones, etc., have been carried out with the minimum delay.

The street fire alarm system, comprising some 150 points, is maintained by the Bengal Telephone Company in a highly creditable manner.

The number of false alarms due to electrical defects in this system shows a satisfactory decrease, being 19 for the year under review as compared with 24 in the previous year and an average of 34 for the past ten years.

**Inspection Department.**—A large number of new cinemas have been licensed during the year. Adequate fire appliances are installed in the majority of theatres, cinemas and places of public amusement, and with few exceptions such premises present no abnormal fire risks.

The work of inspecting these premises is carried out by a Corporation official.

No serious fires occurred in theatres, cinemas or places of public amusement during the year.

In connection with the Licensed Warehouse and Fire Brigade Act I of 1893, 5,161 inspections of warehouses have been made during the year. Four hundred and fifty-three applications and complaints have been attended to and disposed of. Two hundred and eleven prosecutions were made under section 14 of Act I of 1893 which resulted in 153 persons being fined, the fines aggregating in all to Rs. 902. Four persons were warned and discharged, 2 persons were acquitted, 32 cases were withdrawn and 23 cases were filed owing to there being no trace of the parties concerned.

**General.**—The Calcutta Fire Brigade protects the city of Calcutta and the municipality of Howrah, and may attend fires outside the boundaries of the above, but not exceeding a radius of 6 miles from Fire Brigade headquarters, provided appliances can be spared, and on payment of a prescribed fee. The total area protected is approximately 120 square miles, comprising a population of over 2,000,000 persons.

**Ambulance Department.**—The Motor Ambulance Department has again done excellent work and is much appreciated by the public. No less than 15,367 (14,681 in 1930-31) calls were received during the year under review.

I regret still to have to report that great difficulty is experienced in finding accommodation for patients in hospitals.

In 630 (301 in 1930-31) cases patients were taken to 2 hospitals endeavouring to find accommodation for the case. Likewise 223 (82 in 1930-31) were taken to 3 hospitals, 91 (28 in 1930-31) were taken to 4 hospitals, 40 (10 in 1930-31) were taken to 5 hospitals, 42 (7 in 1930-31) were taken to 6 hospitals, 37 (9 in 1930-31) were taken to 7 hospitals, 27 (8 in 1930-31) were taken to 8 hospitals, 27 (5 in 1930-31), were taken to 9 hospitals, 25 were taken to 10 hospitals, 21 (2 in 1930-31) were taken to 11 hospitals, 13 were taken to 12 hospitals and 1 to 13 hospitals.

¶ In 781 (409 in 1930-31) cases accommodation was eventually found but in 396 (43 in 1930-31) cases patients had to be returned to their dwelling, etc., as no hospital accommodation whatsoever was available.

The lack of hospital accommodation is rapidly becoming more evident.

It is no unusual occurrence for ambulances to be engaged for two or three hours vainly endeavouring to find beds for patients, consequently the time occupied per case is much higher than it ought to be and unless further hospital accommodation is provided the Ambulance Department must be considerably augmented to avoid delay in responding to calls.

The time occupied by ambulances searching as above for hospital accommodation amounted to 2,077 hours 22 minutes (731 hours 26 minutes in 1930-31).

As anticipated these figures have considerably increased during the past year in a much greater proportion than the calls received.

It is also found that ambulances are frequently unnecessarily requisitioned for cases which could be removed to hospital by other means. It is hoped that the public will discontinue this practice as thereby the response to many calls for urgent and deserving cases is delayed owing to all ambulances being otherwise engaged.

In cases of calls for persons ill on the public streets ambulances respond immediately without enquiries being made, but when a call is received for a person ill in a private house, etc., the party requisitioning the ambulance is required previously to arrange accommodation in a hospital and the request for the ambulance has to be made by a doctor. Again I have to point out that this has led to a further abuse of the department, inasmuch as many sick persons are now removed from private houses and placed on public footpaths, etc., and then when calling for an ambulance the case is described as "a sick person on a public thoroughfare." Further, in cases of sick persons in private houses to evade the trouble of arranging for accommodation in a hospital and to obtain a doctor's requisition such cases are frequently wilfully misrepresented to be "Accident cases," when of course the ambulance immediately turns out—very often indeed unnecessarily.

Sick street beggars have been a great strain on this department, and ambulances have been occupied for no less than 1,573 (1,254 in 1930-31) hours in dealing with cases of this nature. During the forthcoming year there is no doubt this figure will be much greater.

Under existing circumstances the department, as at present constituted, cannot efficiently cope with the work as is evidenced by the large number of calls to which response was delayed owing to all the ambulances being engaged on other calls. To remedy this the personnel and number of ambulances must be considerably increased, or the rules regulating the use of ambulances amended to check the abuse of the department as above mentioned and which unfortunately shows a decided tendency to increase.

The matter has been represented to the Health Committee of the Corporation, but so far no action has been taken.

Appendix VII gives a brief summary of the work done and Appendix VIII gives the rules governing the use of the ambulances.

The present staff consists of 10 drivers and 20 attendants with 12 motor ambulances. Several of these machines have been in commission for over 11 years. A provision was made for 6 new ambulances in the Corporation Budget for 1930-31, but this expenditure has been postponed for the present. It is essential that new ambulances should be purchased without delay and put into commission. Likewise provision was made in the Establishment Budget for 1930-31 for 2 extra drivers and 4 extra attendants, but this also is postponed.

The department is maintained financially by the Government of Bengal and the Corporation of Calcutta, the contribution from the Government of Bengal for the year under review being Rs. 11,800 and the balance of Rs. 61,113 being paid by the Corporation of Calcutta.

The receipts during the year amount to Rs. 4,249 (4,234 in 1930-31) and the total expenditure was Rs. 72,913.

**RESOLUTION.**

SALT.

New Delhi, the 10th December 1932.

No. 29.—The Government of India recently received representations from the Indian Salt Association, the Karachi Salt Association and the Tuticorin Salt Merchants' Syndicate to the effect that foreign (African) salt was being dumped in the Bengal market at prices, below the fair selling rate fixed by the Tariff Board, with which it was impossible for Indian salt of the same quality to compete, and asking the Government of India to exercise at once the power vested in them under Section 4 of the Salt (Additional Import Duty) Act, XIV of 1931, and increase the additional import duty on non-Indian imported salt.

2. Under the Section just mentioned, if the Governor-General-in-Council is satisfied, after such enquiry as he thinks fit, that salt not manufactured in India is being imported into British India at such a price as is likely to render insufficient the benefits intended to be afforded to the Indian salt industry by the additional duty, he may, by notification in the *Gazette of India*, increase such duty to such extent, not exceeding one anna per maund, as he thinks fit.

3. The Government thereupon, as contemplated by the Section, directed that a public enquiry at which representatives of the various interests affected would be heard, should be held by the Collector of Customs, Calcutta, into the facts of the case to enable them to determine whether there would be any justification for increasing the import duty on foreign salt as requested. The Government have now received and considered the report submitted by Mr. Ward, Collector of Customs, Calcutta, in pursuance of this direction. The report is appended to this Resolution; the Appendices to the Report will be published in the Supplement to the *Gazette of India* in due course.

4. In the opinion of the Government, the result of the enquiry is to show conclusively that up to the present time nothing has happened that would justify any increase in the import duty. Since the beginning of the official year 1932-33, there has been an increase in the quantity of salt of different kinds imported. The amount imported has exceeded the demand, and in consequence the total stocks in the *godas* in Calcutta have

largely increased, while prices have declined. Having regard, however, to the fact that the freights prevailing were appreciably lower during this period than those that formed the basis for the fair selling price fixed by the Tariff Board, it cannot be said that the prices at which foreign salt has hitherto been sold were uneconomic, or that there was any justification for the allegations of dumping by foreign manufacturers that have been made.

5. The increase in stocks is confined, so far as the fine white crushed salt of the Aden or Red Sea type is concerned—to Indian salt, including salt from Aden. The only inference to be drawn from this is that sellers of Indian salt have been more reluctant than sellers of foreign salt to bring down their prices to a level which, for the reason given in the preceding paragraph, cannot be regarded as anything but a fair competitive level. It may be mentioned that there has also been a large increase in the stocks of the superior Liverpool and Hamburg qualities, which, however, do not compete with Indian salt. The stocks of inferior varieties declined considerably but the fall was much more marked under foreign than under Indian salt.

6. It is true that the Government decided after considering the results of the Salt Conference held at Simla in May 1932, that in spite of the reduction of freights that had then occurred, it was not advisable to revise the fair selling price recommended by the Tariff Board and incorporated (less Rs. 2-5-0 being the allowance for brokerage) in Sub-section (4) of Section 5 of the Salt (Additional Import Duty) Act, 1931, since they accepted the view expressed by the Tariff Board that it was undesirable to make frequent changes in the fair selling price merely on account of such fluctuations. But the fact remains that at the present time freights are lower than those taken into account by the Tariff Board to an extent that would justify a reduction of the standard price from Rs. 66 per one hundred maunds to Rs. 56-12-0 per hundred maunds.

7. In the opinion of the Government of India, it would certainly not be defensible, if by the exercise of their extraordinary powers they were now to increase the duty on the ground that freights on foreign salt have fallen, especially in view of the fact that freights on some Indian salt have fallen to a still greater extent. So long as it cannot be said that the Indian producer is placed at a disadvantage relatively to the foreign producer, there is no reason, in the opinion of the Government of India, why the consumer should not enjoy the advantage of a cheapening of salt consequent on the fall in freights.

8. It cannot be said that manufacturers on the main land of India have been prevented from selling their salt by unfair undercutting by foreign producers. It appears that Indo-Aden salt was selling at the standard price of Rs. 66 per hundred maunds and foreign (African) salt at prices equivalent, with the additional duty, to Rs. 59 and Rs. 64 per hundred maunds while Okha was unable to find buyers at Rs. 58 to Rs. 61.

9. The Government therefore consider, as already stated, that no case was made out at the enquiry for increasing the additional duty; but, should any marked further reduction in

the general level of prices be established, which cannot be justified on the ground of a further reduction in freights, the position may require reconsideration. The Government will continue to watch the situation closely in order that action may be taken promptly whenever the necessity may arise.

ORDERED that the foregoing Resolution be published in the *Gazette of India*.

A. H. LAOYD,  
*Joint Secy. to the Govt. of India.*

## REPORT ON SALT ENQUIRY HELD BY MR. W. J. WARD, OFFICIATING COLLECTOR OF CUSTOMS, CALCUTTA.

### INTRODUCTORY.

1. Section 4 of the Salt (Additional Import Duty) Act, 1931, runs as follows:—

“If the Governor-General in Council is satisfied, after such inquiry as he thinks fit, that salt not manufactured in India is being imported into British India at such a price as is likely to render insufficient the benefits intended to be afforded to the Indian salt industry by the additional duty imposed by section 3, he may, by notification in the *Gazette of India*, increase such duty to such extent, not exceeding one anna per maund, as he thinks fit.”

2. The Government of India having received strong representations asking for an increase in the Additional Import Duty on foreign salt thought it desirable that such an enquiry as is contemplated in Section 4 above should be held, and appointed Mr. W. J. Ward, Officiating Collector of Customs, Calcutta, to conduct a public enquiry. A press communiqué was issued and the interests concerned invited to give evidence. The enquiry opened on the 9th November 1932 and closed on the 24th *idem*.

### *Considerations which led to the imposition of the present additional duty on foreign salt.*

3. The enactment of the Salt (Additional Import Duty) Act, 1931, followed a report by the Indian Tariff Board on the Salt Industry. In this report the Indian Tariff Board came to the conclusion that it is possible to produce in India, including Aden, the quantity of salt of the required quality necessary to make India independent of foreign salt. The practical question in this connection is the supply of the salt required for the Bengal market. There is annually imported into Calcutta about 500,000 tons of salt. The Board were of opinion that the whole of this could be supplied from Indian (including Aden) sources. Aden, Karachi, Okha and other places could supply salt by sea and inland sources of production like Khewra and Pachbadra could supply by land if developed and if suitable arrangements were made. The Board found that the chief obstacle in the way of developing an Indian salt industry had lain in the

enormous fluctuations in the price of salt in the Calcutta market, and they considered that stabilisation of prices was the first necessity.

4. The Board recommended the ultimate formation of a Marketing Board which would control the whole of the salt trade, and that as an *interim* measure, Government should assume control of imports and provide India with salt at a fair selling price which they put at Rs. 66 per 100 maunds *ex-ship* in Calcutta for salt of Indo-Aden quality. The Board considered that under this scheme the Indian sources of supply particularly the inland sources, could be developed and with the arrangement of suitable railway rates, could put salt into Calcutta at a reasonable profit if assured of a fair selling price. Government would buy Indian produced salt (including Aden) at Rs. 63/11 per 100 mds. and would sell at Rs. 66. (The difference represents the present brokerage on sales.) In due time the whole of the Bengal market could be supplied from Indian sources, but so long as foreign salt was necessary Government would buy it at as low a price as possible and would sell it at the standard prices.

5. A Committee of the Legislative Assembly was elected to consider the Indian Tariff Board's proposals. They reported against the assumption of control by Government, and recommended (with minutes of dissent by some members) the following scheme:—

- (a) That an additional duty of annas 4 pies 6 per maund on all salt, Indian or foreign, imported by sea into British India should be immediately imposed.
- (b) That the Executive should have power to increase this duty from time to time by amounts up to a total of 1 anna per maund if at any time the price of foreign imported salt should

fall below its present level, the object being to adjust the price of such salt *plus* duty as nearly as possible to the level of the fair selling price as defined by the Tariff Board.

- (c) That a rebate equal to the additional duty should be granted on imported Indian salt on the producer's undertaking to deliver a stipulated quantity of salt to the Government (or such smaller quantity as might be requisitioned) at any time at the fair selling price fixed by the Tariff Board.

[At the time the price of Red Sea salt was in the neighbourhood of Rs. 36 per 100 maunds.]

6. The Salt (Additional Import Duty) Act, 1931, which came into force on the 17th March 1931, enacted with some variations the recommendations of the Committee. The additional duty of four and a half annas was imposed on foreign salt, and to protect the consumer by preventing the price from rising much above Rs. 66, legal machinery was provided whereby Government might require any producer of Indian salt to undertake to sell and to sell his salt to Government at Rs. 63/11 per 100 maunds, failure on the part of the producer rendering his salt liable to be charged with the additional duty on importations into any port in British India.

#### *State of the Salt Import Trade in 1931-32.*

7. The following tables and remarks have been taken from the Report on the Maritime Trade of Bengal for the official year 1931-32 by the Collector of Customs, Calcutta. The additional duty came into force very close to the beginning of the official year (1st April 1931 to 31st March 1932):—

NOTE.— The figures given in this table, like all the other trade statistics in this report, represent the quantities for which bills of entry were put in either for warehousing or direct delivery of salt during the year and will not agree with the figures in the Salt Administration Report, which give the actual Discharge *ex-ship* during the same period.

The figures in the above table forcibly illustrate the result of the differential duty imposed in April 1931 on foreign (other than Aden) salt. Despite a large decline in the total imports supplies from Aden show a large increase. With the aid of the duty, moreover,

the Aden sources concentrated on "crushed" rather than "kurkutch" salt, and thereby stimulated imports of kurkutch from Bombay, and of the somewhat similar product from Tuticorin.

8. The figures in the consumption table have the greater relevance in showing the market position of the various salts, as these figures represent actual clearances for consumption ex-ship and ex-bond.

The most noticeable change is the large decrease in the imports and consumption of foreign salt and the very large increase in the supply from Aden. The figures for 1930-31 and 1931-32 are—

Imports.		1930-31.	1931-32.
		Tons.	Tons.
Foreign ..	..	378,659	88,004

Indian (other than Aden) ..	..	38,898	90,607
Total ..	..	546,507	514,480

The consumption of Aden salt increased from 141,300 tons in 1930-31 to 318,111 in 1931-32. The consumption of Indian (other than Aden) salts increased from 38,898 tons to 90,607 tons. The details of the latter importations are given below—

		1930-31.	1931-32.

Of these only Okha and Karachi claim consideration as fine white crushed salt of quality suitable for the general Bengal market. The consumption of these increased from 14,454 tons to 48,153 tons.

9. The figures show that in the year following the imposition of the additional duty considerably greater quantities of Indian sea borne salt went into consumption at the expense of the foreign salts. Restricting consideration to the white crushed salts of Red Sea quality, which form the key to the market position, Aden increased by 176,811 tons from 141,300 tons to 318,111 tons and other Indian sources (Karachi and Okha) by 33,699 tons from 14,454 tons to 48,153 tons. Prices were about the maximum rate of Rs. 66 for Indo-Aden quality salts; in some cases there is suspicion that they were higher.

No salt from inland salt works in India was imported into Calcutta.

*State of the Salt Import Trade in the current official year.*

10. Since the beginning of the official year 1932-33 (on the 1st April 1932) there has been a marked change in the aspect of affairs in the Salt Import Trade. There have been increased imports of salt and commencing about July a continuous decline in rates till recently a price as low as (possibly lower than) Rs. 30 (= Rs. 58 including the additional duty) has been reached in the case of certain Red Sea salt. Appendix A shows arrivals from the 1st April 1932, the kinds and quantities brought, and the disposal, with the selling rates. Appendix D—Tables Nos. 1 to 31 give in detail month by month for each kind of salt imported during the months April to October 1932 the amount in bond in the golas at the beginning and end of each month, the imports during the month, the quantities cleared *ex-ship* and *ex-golas*, together with the market rates published locally. (In these latter tables, the salt is not included as imported until discharged *ex-ship* after weighment.) In making comparison of the market rates of Indian (including Aden) salts with foreign salts, Rs. 28-2-0 has to be added to the rates for the latter on account of the additional duty. The quantities are given in maunds and the rates per 100 maunds. Approximately 27·2 maunds go to the ton.

11. From the table in Appenedix A it is ascertainable that the importation of salt for the period 1st April to 31st October 1932 may be summarised as follows:—

	Fine White crushed.	Kur- kutch and inferior salts.	Liver- pool and Hambu- Vacca.	Total.
	Tons.	Tons.	Tons.	Tons.
Foreign	78,700	1,900	25,000	105,600
Aden	150,300	1,100	..	151,400
Indian (other than Aden)	47,100	22,900	..	70,000
Total	276,100	25,900	25,000	327,000

(The quantities are taken to the nearest 100 tons.)

The figures for Kurkutch and interior salts on the one hand and for Liverpool and Hamburg Vacca on the other have been separated out as it is generally recognised that these salts to a large extent have their own separate markets, and that the competition in the salt trade is focussed on the Red Sea crushed quality salts.

A table showing the importations month by month of each kind of the competing crushed salts of Red Sea quality is given in Appendix C.

12. The amount of salt imported during this period was considerably more than the amount cleared for consumption, as is shown by the figure of the stocks of bonded salt in gola at the beginning and end of the period.

*Gola stocks (in maunds).*

	Liver- pool and Ham- burg Vacca.	Fine White crushed.	Kur- kutch and inferior.	Total.
On 1st April 1932—				
Foreign	12,980	9,68,426	1,04,300	11,75,796

Total	2,03,562	19,37,261	6,26,334	27,67,157

13. Thus the amount of salt in gola increased from 19,82,787 mds. (73,400 tons) to 27,67,157 mds. (102,400 tons), an increase of 7,84,370 mds. (29,000 tons) which represents the excess of importations over clearances during the period. The figures for white crushed salt of Red Sea quality are 9,68,426 mds. (36,000 tons) increasing to 19,37,261 mds. (72,000 tons), an increase of 9,68,835 mds. (36,000 tons).

14. It is noticeable that the gola stocks of foreign white crushed salts of Red Sea quality did not increase as a whole, but that at the end of the period the gola stocks included over 10 lakhs of maunds (nearly 40,000 tons) of Aden and other Indian fine white crushed salts, of which there had been none in gola at the beginning of the period.

15. From these figures it would be natural to infer that the supply has been greater than the demand and that considerable pressure of competition would be set up tending to reduce prices. Actually rates of foreign salts have declined considerably and the sellers of Aden and other Indian fine white crushed salts have had to come down below Rs. 66 per 100 maunds to achieve the sale of their holdings.

16. This requires elucidation in further detail in view of the question whether foreign imported salt is being sold at such a price as is likely to render insufficient the benefits intended to be afforded to the Indian salt industry by the additional duty imposed on foreign salt.

17. It has not been possible to ascertain exactly in all cases the rate at which salt has actually been sold. The published market reports give rates in a fair number of transactions, but these published rates may not be exactly correct, as adjustments and rebates are sometimes made.

18. The following paragraphs deal with foreign fine white crushed salts of kinds which compete with the Aden and other Indian salts of this quality.

19. *Assab Fine.*—Five ships brought 8,30,100 maunds (30,500 tons) Assab Fine salt during the period 1st April to 31st October

1932. The full cargo in June was sold *ex-ship*, price quoted Rs. 38. The later shiploads have been sold at lower prices, the published rates going down to Rs. 30. Witnesses gave the current rate as Rs. 28. In spite of the low rates, the latest cargoes have not been disposed of in full *ex-ship*: part has been sent to the golas.

This salt is not generally regarded as quite as good as other Red Sea salts, but the inferiority is slight.

20. *Ras Hafun Fine*.—Two consignments have been imported amounting to 3,65,370 maunds (13,400 tons). A large part of the first lot of Ras Hafun Fine (1,74,580 maunds) was sold *ex-ship*, the price quoted being Rs. 44. This was in May and June. The October shipment was nearly all sold *ex-ship*, the prices being given as Rs. 40 and Rs. 35 but some was sent to the golas. A certain amount of this salt has been sold *ex-gola* mostly at Rs. 44 declining to Rs. 42. This salt is a high quality Red Sea salt.

*Ras Hafun Bright*.—A consignment of 10,980 maunds (1,500 tons) was imported in May. Only a little over a quarter of this was sold at rates Rs. 45 and Rs. 46, the remainder going into gola, whence clearances have been small.

21. *Port Said Crushed*.—At the beginning of the period there were over 5 lakhs of maunds (18,800 tons) of Port Said Crushed in gola. The amount was not appreciably reduced by the time a fresh shipment of 83,620 maunds (3,070 tons) arrived in July. This latter was practically all disposed of *ex-ship* at Rs. 38. Shipments amounting to 2,72,280 maunds (10,000 tons) followed in August, September and October. Practically all of these were disposed of *ex-ship*. The rates given were Rs. 38 in June, July, September and October and Rs. 35 in August. Gola stocks have also been diminished by sales at rates down to Rs. 35.

22. *Hamburg Fine*.—Several small shipments totalling to 2,45,820 maunds (9,000 tons) of this salt have come forward. They have mostly been disposed of *ex-ship* at rates declining from Rs. 56 to Rs. 42.

23. *Massawa Fine White Crushed*.—There have been no importations and the gola stock of over 2 lakhs of maunds (7,500 tons) has been little diminished by sales *ex-gola*. There have been no sales since June and no quotations are available.

24. *Spanish Fine White Crushed*.—One importation of 1,66,510 maunds (6,100 tons) in August was disposed of in full *ex-ship* at Rs. 38.

25. *Djibouti Crushed*.—One shipload of 1,41,300 maunds (5,200 tons) in July. A little over half was sold *ex-ship* at Rs. 36. Sales *ex-gola* have been small. They were quoted down to Rs. 35 in October.

26. The paragraphs immediately following deal with Fine White Crushed salts from Aden.

27. *Aden Fine*.—Numerous shipments amounting to over 77,000 tons have been imported. Practically all the arrivals were sold *ex-ship* at Rs. 66 till October when the whole of one shipload and half of another were sent to the golas. The October price *ex-ship* is given as Rs. 66 falling to Rs. 62. The gola stock on 31st October 1932 was 2,58,980 maunds (9,500 tons).

28. *Aden Solar Fine*.—Several shiploads were imported totalling to nearly 28,000 tons and were practically all sold in full *ex-ship* at Rs. 66 till October, when a large part of the salt which arrived was sent to the golas. October prices are quoted as Rs. 66 and Rs. 62. Gola stock on the 31st October 1932 was 1,54,220 maunds (5,700 tons).

29. *Little Aden Fine*.—One shipment of 5,500 tons was brought in May and was sold *ex-ship* practically in full at Rs. 66. There were no other arrivals before the end of October. The gola stock at the end of October was small.

30. *Indo-Aden Super Fine*. Importations amounted to nearly 40,000 tons, of which nearly all was sold *ex-ship* at Rs. 66.

31. Paragraphs 32 to 36 deal with Indian Fine White Crushed salts other than from Aden imported during this period.

32. *Karachi Larra Fine*. Several consignments amounting to 5,000 tons were imported up to the end of July. Out of these 3,500 tons were sold *ex-ship*. Prices were not published.

33. *Karachi Fine Crushed*.—Two consignments each of 1,000 tons were imported in May and September and sold in full *ex-ship*. No information is available regarding prices.

34. *Karachi Grar Fine Crushed*.—A consignment of 22,500 mds. (825 tons) in June was sold in full *ex-ship*. A similar consignment later in the month was mostly sent to the golas. 12,000 mds. were sold *ex-gola* in October. Prices were not given.

35. *Karachi Grar Fine*.—Consignments totalling 1,35,770 mds. (5,000 tons) arrived and were sold in full *ex-ship*. Quoted prices mostly Rs. 66 declining to Rs. 60.

36. *Okha Crushed*.—Importations amounted to over 9 lakhs of mds. (33,400 tons). Sales *ex-ship* amounted to nearly 3 lakhs of mds., sales *ex-gola* were negligible, and there were over 6 lakhs of mds. in gola on the 31st October 1932. No Okha salt was imported after July. This salt is not so popular in the market as the other salts. It is considered definitely inferior to the run of Red Sea salts and to sell in competition with them would need to be offered at Rs. 4 or Rs. 5 per 100 maunds less according to many witnesses (the agents put the difference at Rs. 2).

The table in Appendix A shows that the Okha salt imported by the "Heinan Maru" in April was not able to sell in full at Rs. 66 while consignments from Aden arriving shortly before and shortly after were sold in full at Rs. 66. 83,000 maunds of the Okha salt were sent to the golas.

The May consignment sold mostly at Rs. 66.

The June consignment could not sell at Rs. 66 and Rs. 65 in the presence of Assab Fine at Rs. 38 (+ Rs. 28 = Rs. 66) and Aden Fine and Aden Solar Fine at Rs. 66.

The July prices are shown as Rs. 61 to Rs. 58, but not a great deal was sold and nearly 2 lakhs of maunds were sent to the golas from one ship and 1,63,000 mds. by another ship which arrived a fortnight later. Between the two dates of arrival of these ships, there arrived shipments of Indo-Aden Super Fine and Aden Fine totalling to 4,60,000 mds. The Indo-Aden consignment was sold *ex-ship* in full at Rs. 66 and the Aden Fine nearly all sold in *ex-ship* at Rs. 66.

These details appear to show that the failure to sell the Okha salt *ex-ship* was due to the sellers not desiring to sell at the current market price for their salt when the shipment arrived. They preferred to send their salt to the golas to await more favourable times which have not yet arrived. It seems that a considerable portion of the salt imported was bought in gola some months ago when prices were higher for re-sale *ex-duty*. The market has fallen, but the holders of the salt have not been willing to lower their rates sufficiently to effect sales. One witness stated that this salt was then being offered at Rs. 55 *ex-gola* but buyers were not coming forward. Purchase of salt *ex-gola* involves to the buyer extra expenses amounting to about Rs. 3/8/- per 100 mds. compared with purchase *ex-ship*, so that Rs. 55 *ex-gola* is about equivalent to Rs. 58/8/- *ex-ship* in attraction to buyers. With salts considered superior to Okha available *ex-ship* at prices down to Rs. 30 or Rs. 28 (= Rs. 58 or Rs. 56 with the additional duty) Okha Crushed salt might easily be difficult to sell at Rs. 55 *ex-gola*.

37. There have been no arrivals of salt from inland Indian sources of supply.

38. *Summary.*—(1) In the years preceding the imposition of the additional import duty, approximately 500,000 tons of salt were cleared for consumption yearly in Calcutta and out of this total Aden provided about 150,000 tons and foreign sources the greater part of the remainder. Indian sources other than Aden did not supply very much.

(2) In the year following the imposition of the additional import duty the consumption of Aden salt increased to over 300,000 tons while the consumption of foreign salt fell from 366,000 tons to 105,000 tons (in round figures). The consumption of salt from Indian sources other than Aden increased from 39,000 tons to 90,000 tons.

(3) In the current official year, the second year following the imposition of the additional import duty foreign salts are being imported in greater amount than in the previous year, though the quantities are greatly behind the importations in the year before the additional import duty was imposed. Aden is keeping

up importations at very much the same rate as last year while other Indian sources sent proportionately more than during last year during the earlier months of this year, though importations were negligible after July.

(4) As a result of the increased supply the selling rates have declined and salt of the quality contemplated by the Indian Tariff Board in fixing their fair selling price at Rs. 66 per 100 maunds could at the end of October be purchased at Rs. 58 per 100 maunds (*i.e.*, Rs. 30 *plus* Rs. 28 representing the additional import duty) and possibly at Rs. 56.

39. It is interesting in this connection to examine the basis of the rate of Rs. 66 per 100 mds. as the fair selling price. The discussion of this will be found in paragraph 41 (page 35) of the Indian Tariff Board's Report of 1930. The Tariff Board gave details of their calculation. There is no evidence that the factors making up the total have varied to any extent since the calculation was made except in the cost of freight. The Tariff Board came to the conclusion that over a period of years Rs. 8 per ton for freight was not unreasonable. It has to be noted however that freights have been much lower than this over the whole period since the additional import duty was imposed. The rates during the current financial year have been Okha Rs. 4/8/- to Rs. 4/12/-, Karachi Rs. 5 Aden Rs. 5/4 to 5/8/-, Red Sea ports the same or 2 or 4 annas higher than Aden. In view of these rates of freight suppliers might be expected to be able to sell their salt at lower prices than those based on the standard rate. Taking the Aden freight as Rs. 5/8/- the difference of freight below the Tariff Board's figure amounts to Rs. 2/8/- per ton, or Rs. 9/4/- per 100 mds. If this be allowed for the standard rate is reduced from Rs. 66 to Rs. 56/12/- per 100 mds. The lowest price mentioned in evidence as the selling price of standard quality up to the end of October is Rs. 28 per 100 mds. for Assab salt, a Red Sea salt of slightly inferior quality. With the additional duty this comes to Rs. 56/2/- very little below the standard rate adjusted for the difference in freight between present rates and the rate taken by the Tariff Board in fixing the standard rate.

#### *The position in November 1932.*

40. During the current month (November) the following amounts of salt of Red Sea quality have arrived up to the date (24th November):—

		Tons.	Tons.
Foreign —			
Hamburg Fine .. ..	4,400		
Spanish .. ..	9,000		
Port Said .. ..	1,500		
Ras Hafun .. ..	6,100		
			21,000
Aden —			
Aden Fine .. ..	17,000		
Little Aden .. ..	5,000		
Indo-Aden .. ..	6,100		
			28,700
Other India—			
Karachi Luxmi. . . .	1,000		
			50,700
Total .. ..			

This, with the month uncompleted, is the biggest importation in a month this year (*vide* Appendix C). Aden has sent an unusually large amount, while the arrival of the large consignment of Spanish salt has swollen the total of foreign importations. The result is that competition is accentuated and rates are lower still. The holding of this enquiry has also tended to depress prices, on account of the nearer possibility of a higher duty on foreign salt. This makes the sellers of foreign salt more anxious to sell their salt at once. Aden salts are shown in the market reports as having been sold at Rs. 58 and on the 24th November a witness gave the price as Rs. 53.

41. Regarding the future there is little information and the question whether imports will continue on the present scale is impossible to answer. In their representation, dated the 16th September, the Indian Salt Association included in their Statement "B" as fixed to arrive 2 steamers with Ras Hafun salt, 1 with Assab and 1 with Port Said salt. These steamers arrived on the 21st October, 24th November, 24th October and 10th October, respectively. The October arrivals represented all the foreign salts imported except a small consignment of Hamburg Fine. The Indian Salt Association thus had practically complete information of the arrivals for a month ahead. In their further representation, dated the 8th November, the Indian Salt Association gave information of 4 expected shipments, of which two have already arrived, leaving only two shipments of Ras Hafun for the future. No shipment of Assab salt (the biggest competitor recently) has arrived this month and none appears to be expected in the near future at least. Rates have dropped so low that there can be little immediate attraction to foreign manufactures to send salt to Calcutta. There is an indication therefore meagre but with no evidence against it, that the situation will be eased by a falling off of imports from foreign salts.

42. Fine White salt from Indian sources other than Aden has practically disappeared from the import tables since July (*vide* Appendix C and paragraph 40) and apart from some consignments of Tuticorin Kurkutch there have been no importations of other kinds of salt from these sources since July. The Tuticorin consignments in August, September and October totalled approximately 6,500 tons. Even in the early part of the year, however, the supplies of crushed salt from Indian sources other than Aden did not amount to much apart from the importation of Okha. Okha sent 33,400 tons, all before the end of July; the remainder came from Karachi which sent 10,800 tons up to the end of July and 2,900 tons in August and September. These salts have not shown an ability to establish and expand their place in the market against the competition of Aden and the foreign salts: and under the stress of the competition of the past few months their importation has practically stopped. The importations of Aden on

the other hand show no sign of lessening and the only apparent effect of the competition is the lowering of the price. Moreover it is only during the last few weeks that Aden salts have had to drop their price below Rs. 66 for any length of time.

43. There is no evidence that the foreign interests have made and are making a collective assault on the whole market. The total amount of foreign salt of Red Sea quality imported during the period 1st April to 31st October is 78,700 tons against 150,300 tons from Aden and 47,100 tons from other Indian ports. There is no indication of any deliberate policy of underselling. When prices equivalent to the standard of Rs. 66 (*i.e.*, Rs. 66 less Rs. 28=Rs. 38) could be obtained, the foreign salt has been sold at that price: otherwise the offered price was depressed only sufficiently to clear the ship. Frequently the depression of price was not carried to this point and rather than sell at lower prices, the sellers sent the salt to the golas. In May one-third of the Ras Hafun consignment was sent to the golas. In July Djibouti and Assab salts were sent to the golas in large quantity. Assab salt was also sent to the golas in September and October. The figures below show that actually a greater percentage of the importation of foreign crushed salt of this quality was sent to the golas than was the case with the Aden salt.

	Imports.	Sent to golas.	Percentage sent to golas.
	Tons.	Tons.	Per cent.
Foreign	78,700	16,500	21
Aden	150,300	21,300	14

The inference from these figures is that the foreign interests were not anxious to sell their salt *ex-ship* at lower than its proper market price in the circumstances existing at the time. In the case of Assab the principal foreign competitor, the figures are imports—30,500 tons; sent to golas—8,800 tons; percentage 29 per cent.; and for Ras Hafun the next biggest competitor 14,900 tons, 2,300 tons, 22 per cent.

**First Forecast of the Spring Oilseed Crops of  
Bengal, 1932-33.**

(*Note.*—On an average of the five years ending 1930-31, the area under linseed in Bengal has represented some 3·6 per cent. and that under rape and mustard 11·2 per cent. of the total areas under these crops in British India.)

*Explanatory.*—Three forecasts are issued for the spring oilseed crops. The present one deals with the area sown and the condition of the crops.

**Area sown.**—Oilseeds are principally grown in the Rajshahi, Dacca and Presidency Divisions. In the other two divisions, the cultivation is small. The total area under these

crops (excepting sesamum for which separate forecasts are issued) is returned at 868,800 acres this year as against 933,600 and 940,700 acres, respectively, in the corresponding and final forecasts of last year.

**Character of the season.**—Although the rainfall in September and in the first part of October was generally below the normal, it was adequate for the preparatory tillage. In the latter part of October and the first part of November, the conditions were not favourable owing to untimely heavy rain which delayed the sowings of the crops in many places, especially in parts of North and East Bengal. Subsequently since the latter part of November, however, dry weather has been helpful to further sowings and growth of the crops. The outlook of the crops, at present, is reported to be fair on the whole.

## DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 15th December 1932.

### Monthly Weather and Crop Report of Bengal for November 1932.

**I. Character of the season.**—During the first part of the month under review, the rainfall was much in excess of the normal, while in the latter part there was practically no rain. The usual rainfall statement is appended.

**II. Progress of agricultural operations.**—During the first part of the month the sowings of spring crops were retarded by wet weather but subsequent conditions were favourable to the agricultural operation. Harvesting of early winter paddy commenced in East and North Bengal during the latter part of the month.

**III. State of standing crops.**—The condition of standing crops was not favourable during the first half of the month owing to rains but the crops recovered later.

**IV. Prospects and probable outturn.**—The prospects of crops were affected in places by the untimely rains during the month. The outturns of autumn and winter rice are

estimated, respectively, at 83 and 90 per cent. of the normal.

**V. Damage to standing crops.**—Damage to spring crops and winter paddy by rains was reported from several districts of the province.

**VI. Condition of agricultural stock.**—The condition of live-stock was generally fair. Sporadic cases of cattle-disease, however, were reported from ten districts of the province and from the Cooch Behar and Tripura States.

**VII. Failure of pasturage and fodder.**—The supply of fodder was reported to be sufficient throughout the presidency.

**VIII. Prices of food-grains.**—During the second fortnight of the month, the price of common rice of the cheapest quality rose in three districts, fell in nine and remained stationary in the rest of the province. The prices varied from 17 seers per rupee at Malda to 11 seers per rupee at Darjeeling and Noakhali.

**IX. Condition of agricultural population.**—The condition of agricultural population was, on the whole, fair.

#### **NOTIFICATION.**

No. 960L.C. -- 17th December, 1932. The following report of the Select Committee on the Calcutta Municipal (Second Amendment) Bill, 1932, with the Bill as amended by the Committee, is hereby published for general information.

**Report of the Select Committee on the Calcutta Municipal (Second Amendment) Bill, 1932.**

We, the members of the Select Committee of the Bengal Legislative Council to which the Bengal Municipal (Second Amendment) Bill, 1932, was referred by a motion carried in the Bengal Legislative Council on the 5th December, 1932, have the honour to submit this our Report with the Bill as amended by us annexed. All matter omitted by the Select Committee has been printed in italics and enclosed in square brackets and all new matter inserted has been underlined.

1. The Bill was published in English in the *Calcutta Gazette* on the 1st December, 1932.
2. The Committee met on the 6th December, 1932, and concluded its sittings on the 7th idem.
3. We do not consider that the Bill has been so altered as to require re-publication.
4. The changes made in the Bill are detailed below :—

*Clause 3.* We have increased the number of elected Councillors from seventy-nine to eighty-one as we consider it desirable by a majority to give two more seats to the **Muham-**madans. The additional six seats have been allotted on the population basis one each to Wards Nos. 4, 7, 13, 15, 20 and 30. We do not consider it necessary to allot another seat to Ward No. 9 and item No. (2) of clause 3 has been omitted accordingly.

*Clause 4.*—Consequential changes have been made in this clause.

*Clause 5.*—This new clause is a supplemental provision on the lines of section 44 of the principal Act to provide against any difficulties which may arise in connection with the first general elections to be held after the commencement of this Act.

**Minute of dissent by Mr. A. Raheem, C.I.E.**

First of all I disagree with the system of "Joint Electorate" for Muhammadans in the Calcutta Corporation. Secondly the 19 seats allotted to Muhammadans are not at all adequate for them in a house of 92. I am of opinion that in case the system of "Joint Electorate" is adopted, the Muhammadans must have 25 per cent. seats on the total number of the Councillors elected or nominated plus some additional seats by way of weightage which they are entitled to on account of their being in minority. The Europeans are also elected, though not by general constituency but by a special constituency, and there seems to be no reason why they should not be taken as elected Councillors, and by excluding them from the elected number, the Muhammadans be deprived of their legitimate right of 25 per cent. seats on the number of European seats.

**Minute of dissent by Mr. H. S. Suhrawardy.**

The Muslims of Calcutta are being deprived of a valuable right by efflux of time, although the conditions and the mutual relations between the two communities in Calcutta do not justify it. Calcutta, though a municipality in Bengal, stands quite apart by itself. It is comparable to a province. It has a large income, vast resources, extensive patronage and peculiarly varied interests. It can do immense good, or if it choose, it can deprive any class, community, race or quarter of the town of its benefits. The systematic manner in which the interest of Muslims has been ignored, and the inability of the Muslims to make the Corporation realise its duties towards it, and pay due consideration to their interests, wishes and feelings, make it desirable that the Muslims should be given weightage, which might give them the position of an effective minority. A few more seats to Mussalmans will not materially affect the Hindu majority, but will, at the same time, furnish an example of that feeling of toleration and desire for co-operation and goodwill which it is essential to establish in Calcutta, and which is bound to have its beneficial influence in other places.

## THE PURI LODGING HOUSE (AMENDMENT) BILL, 1932.

## BILL

*further to amend the Puri Lodging House Act, 1871.*

## Preamble.

WHEREAS it is expedient further to amend the Puri Lodging House Act, 1871, in the manner hereinafter appearing;

AND WHEREAS the previous sanction of the Governor General under sub-section (3) of section 80A of the Government of India Act has been obtained to the passing of this Act ;

5 & 6 Geo.  
V, c. 61 ;  
6 & 7 Geo.  
V, c. 37 ;  
9 & 10 Geo.  
V, c. 101.

It is hereby enacted as follows :--

## Short title.

1. (1) This Act shall be called the Puri Lodging House (Amendment) Act, 1932.

## Commencement.

2. It shall come into force on such date as the Local Government may, by notification in the *Calcutta Gazette*, direct.

## Amendment of section 1.

3. In section 1 of the Puri Lodging House Act, 1871, for the definition of the word "lodger" substitute "lodger shall mean an inmate who resides in any house, and shall include a person who pays or delivers to his *panda* or the owner of the house or to any other person on behalf of his *panda* or owner, money in a lump sum, or property or both, in consideration for the provisions of accommodation and bodily comforts by such *panda*, owner or other person in any place other than the place of residence of such *panda*."

## STATEMENT OF OBJECTS AND REASONS.

In the district of Chittagong, Sitakund is a famous place of Hindu pilgrimage. Pilgrims from all parts of India visit the shrines of Shambhunath and Chandranath specially during the Shiva Chaturdashi festival when a great fair is held for about 15 days visited by several thousands of pilgrims. From very ancient time there were eight families of *pandas* who used to accommodate and look after the welfare of these pilgrims and help them in their pilgrimage. The Puri Lodging House Act having been extended to this place, those *pandas* have to pay house-tax according to the law and rules framed thereunder. But of late some adventurous people have erected houses where they invite the pilgrims but do not get these houses licensed on the pretext that they do not charge the inmates for accommodation. These people have either put some idols or show that they are *shadhus* (pious men) with philanthropic motives but when the pilgrims are about to leave their houses they say that they are to pay either for worship of idols or help *shadhus* and pilgrims when they would come and in this way manage to get from these pilgrims more than what the *pandas* would get. It is to see that these persons do not avoid payment of license fee this Bill is introduced.

## STATEMENT OF OBJECTS AND REASONS.

The waterways in the district of Nadia are to-day in conditions of worst deterioration. They are mostly dead, are still dying and will in all probability all die, unless early measures are even now taken to reclaim and resuscitate them into active and flowing streams. Nature put around the district of Nadia and in between, priceless streams of health and prosperity: its soil annually received a rich silt deposit yielding abundant crops for the cultivators with little trouble, while the flowing streams gave them good health. The district was then considered to be a sanitorium and the people had always plenty to eat and had good water to drink.

Things have all changed. The soil is gradually becoming poorer day by day and the fertility has now reached the lowest point. The scarcity of good water for drinking and of sufficient water for other purposes in a village has annually been responsible for the heavy toll of mortality from cholera, while malaria is the curse of rural life to-day.

It is urgently necessary that the special attention of all must be paid to this problem, which in Nadia is a problem of life or death. It may or may not be true that the problem of the big rivers is not easy of solution, but the smaller streams and waterways can still be saved. The Irrigation Department has hitherto been primarily busy with big projects and schemes. The local bodies in the district never thought that they need have any concern to look after any waterway or to evolve any scheme for the purpose. As a matter of fact the local bodies lack the necessary powers for any such work and of late they are being entrusted with so many responsible works that it cannot be expected that even if they had the power, they would be able to tackle the problem from any comprehensive point of view.

The alternative from this state of things is the creation of a statutory board of waterways for the district of Nadia. A few years back I attempted to organise an unofficial board for the purpose, but it failed owing to the absence of any statutory power behind.

The present Bill proposes the creation of a statutory board to look after the waterways in the district of Nadia. There is strong representation of the district board in the new statutory body as also adequate representation of the municipal areas which have a common interest in the matter. It is also expected that the Departments of Public Health and of Irrigation will be represented in the board through nomination, so that all schemes may be together looked at from different points of view and it may be possible to evolve co-ordinated scheme for the improvement of the waterways.

The real problem is of finance. Not a step can be moved without adequate funds. I am not sure how long we have to wait if we solely depend upon Government aid. On the other hand, there is hardly any scope for further taxing the people. We must, therefore, in the main find out the money from the current resources available.

Tolls and ferry-receipts of the local bodies in the district seem to be the most appropriate head for meeting the expenses of such works. It is only fair that at least a part of income from the waterways should be spent for the benefit thereof. The total ferry-receipts of the Nadia District Board is about Rs. 50,000 per annum. The people have to pay this amount owing to the existence of the waterways. The logical thing would be to make the whole of this fifty thousand available for expenditure on waterways, but it is too late to quarrel with the past. The district board and the other local bodies have expanded their works partly depending on this income and it would not be proper to take away this income all on a sudden. But the claim for a part of this income cannot and should not be resisted. In estimating the share, however, the difficulties of figure come in. One important fact may be noted here. The cess revaluation has recently given Nadia an increase of a lakh and fifty thousand rupees. It may further be noted that the recently transferred provincial ferries fetch an additional income of Rs. 25,000 for the Nadia District Board, while the other ferry income and tolls contribute a further sum of Rs. 25,000.

Considering all these factors, it would be fair if 25 *per cent.* of receipts from the transferred provincial ferries and 10 *per cent.* of other ferry income be made available for the reclamation of the waterways. The income from provincial ferries has only come to the local bodies from 1928-29 and it cannot be said that the local bodies have long based their expenditure on this income. Such is not the case with the other ferry income. It has come to be part of the normal income and it would be hardship to cut any large part out of it.

There is another source of income which should be made available for this purpose. The levy of toll on Ezechiel bridge has just ceased from last year. This levy may continue. This will bring an additional income of Rs. 5,000 per annum. It is, however, felt that this should be on one condition, *viz.*, that the whole of this amount may be spent for the benefit of the waterway on which the bridge stands or for the waterways of the Meherpur subdivision.

To meet the initial expenditure the district board may easily hand over 50 *per cent.* of the arrear cess dues that remain unrealised by 1st April, 1932, on account of cesses payable up to 31st March, 1932. The new board may also have the power to levy tolls on all waterways that come within the scope of its operation. The municipalities have also been made liable to pay a part of their ferry income. The private ferries should also contribute in equal proportion, but not exceeding 10 *per cent.* of their income.

The Bill has been drafted on these outlines and it is hoped that it will receive a sympathetic passage.

**DEPARTMENT OF AGRICULTURE,  
BENGAL.**

Dacca, the 6th December 1932.

**Second Forecast of the Winter Rice Crop of  
Bengal, 1932-33.**

(NOTE.—On an average of the five years ending 1930-31, the area under winter rice in Bengal has represented some 17·4 per cent. of the total area under rice in British India.)

**Character of the season.**—As reported in the first forecast, defective rainfall in February, March and April interfered with the preparatory tillage and sowing of broadcast paddy. Good rainfall in the latter part of May and in June helped the growth of the broadcast paddy as well as the preparatory tillage for transplanted paddy and its sowings in seed-beds. Moderate rainfall in July and August was beneficial to the growth of the crop. Occasional rainfall and alternate sunshine in September and October helped the growth and final development of the transplanted paddy. But unusual rainfall in the early part of November, when the crop was ripe for harvest, caused slight damages at places. On the whole a satisfactory outturn is expected for the province.

**Acreage.**—According to the figures returned by the District Officers the total area under winter rice is 15,537,300 acres as compared with 15,511,900 and 15,571,400 acres in the corresponding and final forecasts of last year.

**Outturn.**—From the summary of the district returns appended it will be seen that two districts report a normal crop, twenty districts report a crop varying from 74 to 98 per cent. and five districts only report a crop as low as 67 to 70 per cent. of the normal. According to the above estimates, the provincial outturn works up to 83 per cent. of the normal as against 95 and 100 per cent., respectively, estimated by this department in the corresponding and final forecasts of last year. In my opinion this is an underestimate and the provincial outturn will not fall short of 90 per cent. of the normal this year.

Accepting 90 per cent. as the provincial outturn, the gross yield of the crop on the basis of a normal yield of 13½ maunds of clean grain per acre is estimated at 6,934,700 tons this year as against 6,766,700 and 7,150,100 tons, respectively, in the corresponding and final forecasts of last year.

G. P. HECTOR,

*Director of Agriculture, Bengal.*

- (i) the powers of the Manager to make or sanction settlements; and

#### STATEMENT OF OBJECTS AND REASONS.

By an indenture made on the twelfth day of March, 1891, between the Secretary of State for India in Council and the Nawab Bahadur of Murshidabad setting at rest many matters which had hitherto been the subject of considerable perplexity, the title of the Nawab Bahadur, the incidents of his tenure of various properties specified in the indenture, and the provision to be made for his own maintenance and support, and that of his honour and dignity were definitely set forth. This indenture was confirmed and given effect to by an Act of the Indian Legislature—"The Murshidabad Act, 1891". The indenture contains a stipulation that if the Nawab Bahadur acted in contravention of the terms of the indenture, or by a course of extravagance or by waste or mismanagement of the immoveable properties included in the indenture disabled himself, in the opinion of the Secretary of State for the time being, from duly maintaining the dignity of his position, it should be lawful for the Secretary of State at his discretion to enter upon the immoveable properties, take possession thereof and administer them for the benefit of the Nawab Bahadur during his lifetime.

Under the powers so given the Secretary of State has during the lifetime of the present Nawab Bahadur of Murshidabad so assumed charge of the estate and of the Government pension provided for in the indenture. Machinery for the exercise of such management by the Secretary of State was not however provided for in the indenture and it is to supply this that the present Bill is designed. The management will be exercised through a Manager, acting on behalf of the Secretary of State. The Manager will work under the supervision and control of the Government of Bengal; in which Province the majority of the properties concerned lie. His powers and duties are defined by the Act, which further provides machinery for the ascertainment and gradual liquidation of the liabilities contracted by the Nawab Bahadur, while assuring that suitable provision will be forthcoming for the maintenance of his position and dignity and that he will be protected against arrest in pursuance of any process of a Civil Court.

The proposals contained in the Bill have been put forward by the Government of Bengal. The local legislature of that Province has not however power to give legislative effect to all of them, since they affect landed properties outside that province, and possibly the jurisdiction of Courts which that legislature cannot control.

**THE Bengal and Madras Service Family Pension Fund** which is provisionally managed and assisted by Government has for its object the provision of monthly pensions for the maintenance of the widows and children of subscribers and is open, with certain exceptions, to all active and pensioned members of the Uncovenanted service of Government (except those serving under the Government of Bombay), and to Local Fund servants earning pensions from Government. Some of the special features of the fund are (1) that widowed daughters incapable of remarriage or children labouring under such mental or bodily infirmities as incapacitate them from earning their livelihood or preclude the possibility of marriage (in case of a daughter) are admitted to its benefits; and (2) that subscribers to the Widows' and Daughters' branches are entitled to a refund of 30 per cent. of the premia paid, should the nominee predecease them after five years of admission. The second quinquennial valuation of the Fund has been completed by the actuary to the Government of India, and his report discloses very favourable results.
